FOR E W O R D

This gazetteer contains about 11,800 entries for places and features in the Peoples Democratic Republic of Yemen. The research for this publication was completed in April 1976.

The entries include standard names approved by the U.S. Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous Board lists for the area.

The basic name coverage corresponds generally to that of maps at the scale of 1:250,000. Entries include the names of populated places of all sizes, various other cultural entities, and a variety of physical features.

Most of the entities can be identified and located by the approved name or a recognizable variant of the approved name on one or more of the following sources:

1. *The Yemen Arab Republic and Neighbouring Areas 1:250,000*, Director of Military Survey, Ministry of Defence (U.K.), 1974.
2. *South Arabia 1:100,000 or Protectorate of South Arabia/Aden Protectorate 1:100,000* (Series Nos. K669 and K667), Directorate of Military Survey and Directorate of Overseas Surveys, (U.K.), 1958–69.
3. *Arabian Peninsula 1:500,000* (Series K462), Army Map Service or Directorate of Military Survey (U.K.), 1963.
4. British Admiralty charts, Hydrographic Department, Admiralty, London, various dates and scales.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in this gazetteer in order to accommodate it to machine tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see."

Cross-references usually have been omitted for such variant spellings of *Jabal*, as *Cebel* and *Jebel*, and differences in the spellings of the article, *al*, *el*, *an*, etc. Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus *Jabal 'Amd*, the name of a mountain, is listed as '*Amd, Jabal*'. If part of a name is underlined, the use of the part not underlined is optional. If two or more names are approved for a feature, each is identified in parentheses and any or all may be used.

Language labels are used to identify alternate local names of noninternational features. Local names of international features are identified by major-political-entity labels. *Yemen (Aden)* and *Yemen (Sana)* have been used to identify the Peoples Democratic Republic of Yemen, and the Yemen Arab Republic, respectively.

As far as possible, Arabic names in this gazetteer have been romanized from Arabic script according to the transliteration system used jointly by the Board on Geographic Names and the Permanent Committee on Geographical Names for British Official Use (the BGN/PCGN 1956 System), which follows on pages vii through xii. It is almost always necessary to add missing symbols for short vowels (vowel points) in Arabic.

script and to rewrite dialectal forms in standard written Arabic. Names found written only in Roman letters but recognizable as Arabic have been reconstructed into Arabic script and then transliterated.

An exception to the above policy has been made in regard to names on or about the Island of Socotra. A list of Socotri names supplied by the Permanent Committee on Geographical Names (U.K.), the result of field work by Professor Tom Johnston, was utilized as a supplementary source and a number of names were approved in the form found on the list. These names are identified by an asterisk (*) preceding the designation.

Where the complete Arabic script form of a name could not be determined, the name has been cited as found in Roman script source materials. These names are also identified by an asterisk (*) preceding the designation. Recognizable Arabic parts of such names are romanized in accordance with the BGN/PCGN 1956 System.

The diacritical marks used in approved Arabic names in the area covered by this gazetteer are the macron (')¹, the cedilla (,)², and the acute accent ('). These marks are to be used whether the names are written in capital or lowercase letters. In addition, the apostrophe (') and the inverted apostrophe (‘), representing the letters *hamzah* and *'ayn*, respectively, frequently occur in Arabic names.

In writing Arabic names in capital and lowercase letters, every word in a name should begin with a capital letter except the following when they are not name-initial: *wa* (and) and the definite article *ad*, *aq*, *adh*, *al*, *an*, *ar*, *as*, *aq*, *ash*, *at*, *aq*, *ath*, *az*, and *aq*. The nonstandard Arabic article *an*, which occurs infrequently, has been changed to the appropriate standard Arabic form. The word *Al* (with a macron) should not be confused with the definite article, and should always begin with a capital letter.

Designation.—The second column contains designations or abbreviations of designations, as listed below. Because practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied in this gazetteer are stated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. Some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

ADM'D	first-order administrative division (muḥāfaẓah); second-order administrative division (mudīriyat)
ALUV	alluvial fan (alluvial deposit of a watercourse [wadi] where it emerges from broken country and debouches upon an open plain)
ANCH	anchorage (place within a harbor or roadstead where ships may anchor)
AREA	area (tract of land identified by a name, but without homogeneous character or established boundaries; may have been identified for characteristics which no longer pertain)
BAY	bay (coastal indentation of a size intermediate between a gulf and a cove)
BGHT	bight (open body of water forming a slight recession in a coastline)
BNKM	marine bank (an elevation of the sea floor located on a shelf and over which the depth of water is relatively shallow but sufficient for safe surface navigation)
BSNH	headwater basin (area drained by the headwaters of one or more streams; watershed (area encompassing the entire tributary system for a single watercourse)
CAPE	cape (seaward end of a projection of land of such position and size as to affect the course of ships)

CAVE	cave(s) (underground cavity, usually in soluble rock)	HLL	hill (landform of moderate relief, moderate elevation, and small summit area)
CHNM	marine channel (channel between an offshore feature and the mainland)	HLLS	hills
CLF	bluff (high, steep bank, without conspicuous exposed rock, overlooking a lower area such as a valley or the sea); cliff (high, steep rock face overlooking a lower area, such as a water body, coastal lowland, or valley)	INLT	inlet (small, narrow indentation in a coast)
CMP	campsite	ISL	island
CMPM	military camp	ISLS	islands
CMTY	cemetery	LCTY	locality (minor area or place of unspecified or mixed character)
CNLI	irrigation canal	LEVN	natural levee (naturally aggraded banks of a watercourse in a flood-plain)
CONE	volcanic cones (cone-shaped elevations formed by volcanic eruption, usually with a crater or breached crater at the top)	LGN	lagoon (water body along a coast, largely or wholly cut off from the sea by a barrier beach or fringe of islands)
COVE	cove (small bay)	LKC	crater lake (lake in the crater of an extinct or inactive volcano)
CRTA	crater (generally circular, central depression in a volcanic cone)	MCTY	municipality [Aden Municipality]
CTN	cistern (covered tank or reservoir for the storage of water, usually masonry-lined and below ground level)	MESA	mesa (flat or nearly flat landform less extensive than a plateau with an abrupt or steeply sloping side or sides)
CULT	cultivated area	MNN	salt mines
EPR	depression (lower area wholly or largely surrounded by higher land; ordinarily has interior drainage and does not conform to the valley of a single stream)	MSQE	mosque (Islamic house of public worship)
DSRT	desert (barren tract characterized by arid climate and sparse xerophytic vegetation)	MT	mountain (landform of conspicuous relief, moderate to high elevation, and small summit area)
DUNE	dune(s) (hill or ridge of sand formed by the action of wind)	MTS	mountains
FT	fort (defensive structure or works, generally of little or no military significance; may be in a state of ruin)	PASS	pass (way over or between mountains or other elevated land)
GULF	gulf (large, broad water body indenting a coast)	PCLI	independent political entity (republic)
HBR	harbor (body of water providing shelter for ships)	PEN	peninsula (area of land projecting into and largely, but not entirely, surrounded by water)
HDLD	headland (conspicuously high piece of land jutting into or fronting the sea)	PK	peak (separately-named summit on a more extensive elevation)
		PLAT	plateau (extensive elevated area of flat to rolling surface; may exhibit considerable local relief due to dissection or the presence of hills or mountains rising above the general surface level)
		PLN	plain (landform of low relief, slope, and elevation); coastal plain; floodplain
		POOL	pool (small body of water in the bed of a wadi)

PPL	populated place (city, town, village, or settlement)	STM	stream (river or other running, fresh water body, perennial in all or a part of its course)
PPLS	group of villages	STRT	strait (relatively narrow water passage connecting larger bodies of water)
PROM	promontory (piece of an area of high, generally flat land jutting into surrounding lower land; similar to a headland except for its inland location)	TMB	tomb(s)
PT	point (relatively minor projection of land, or its extremity, into a water body)	TRB	tribal area
RDGE	ridge (elongated, relatively narrow relief feature with a more or less continuous crest)	TRGD	interdune trough (elongated corridor between parallel dunes)
RF	reef (offshore consolidated-rock hazard to navigation with a least depth of 20 meters [or 10 fathoms] or less)	UPLD	upland (broad elevated area with low to moderate surface relief)
RGN	region (large area recognized as an entity by reason of the unity of its history, people, landscape, or other condition or a combination of conditions)	WAD	wadi (watercourse or drainageway that carries only occasional flows of water)
RKL	rock on land (boulder, pinnacle, crag, or other rock or rock outcrops situated on land)	WADS	wadies
RKSL	rocks on land	WADX	section of wadi
ROAD	ancient road	WLL	well (dug or drilled source of water)
RUIN	ruin(s) (structures in a state of ruin, but not necessarily of great antiquity or of archeological interest); ruined village	WLLS	wells
RVN	ravine (short, steep V-shaped watercourse)	WTRH	waterhole; rainpool (low place where water accumulates temporarily following rains)
SALT	salina (saltworks)		
SAND	sand area (includes large tracts of desert sand not in the form of dunes)		
SBKH	sabkha (salt-impregnated ground without vegetation, intermittently wet from rainfall or seepage; slippery when wet, salt-encrusted when dry; occurs in depressions and along low coastlines)		
SCRP	escarpment (more or less continuous line of cliffs or steep slopes facing in one direction, caused by differential erosion or faulting or both)		
SEA	sea		
SITE	ancient site		
SPNG	spring(s)		
SPUR	spur (short sloping ridge extending laterally from a mountain or other elevation)		

Latitude and longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of wadies, at the summits of mountains and hills, at the extremities of capes and points, and near the centers or midpoints of other features.

Area number.—The number in the fifth column is the first-order administrative division and/or country in which the place or feature is located as explained below:

- | | |
|--------|---|
| 415.80 | Peoples Democratic Republic of Yemen [Yemen (Aden)] (General, and for features in more than one division) |
| 415.81 | Al Muḥāfaẓah al Ūlā |

415.82 Al Muḥāfaẓah ath Thāniyah
 415.83 Al Muḥāfaẓah ath Thālithah
 415.84 Al Muḥāfaẓah ar Rābi'ah
 415.85 Al Muḥāfaẓah al Khāmisah
 415.86 Al Muḥāfaẓah as Sādisah

NOTE: Formation of a seventh first-order administrative division from a portion of the present fifth governorate was reported in 1975. However, no further information regarding its size, exact location, boundaries, or official name has been received prior to publication date. An additional province was established in July of 1976, according to a later report.

Glossary of generic terms

The following terms occur as the generic parts of standard names in the gazetteer. The English term or terms which correspond to each local term were applied after objective study of cartographic and other source materials, and do not necessarily reflect dictionary or other normalized usages. Terms designated (S) are Socotri; the remainder are Arabic.

TRANSLITERATION SYSTEM FOR ARABIC GEOGRAPHIC NAMES

BGN/PCGN 1956 System (Revised in 1972)

The BGN/PCGN 1956 System for the Arabic alphabet is designed for use in transliterating standard written Arabic. It was adopted by the BGN in 1946 and by the PCGN in 1956 and has been applied by the Board, so far as practicable, to the systematic romanization of geographic names in Syria, Lebanon, Jordan, Iraq, the Arabian Peninsula, the United Arab Republic (Egypt), Libya, the Sudan, and Tunisia.

The system is designed to bring about uniformity in the spelling of geographic names in Arabic-language areas by eliminating deviations resulting from pronunciation differences in various dialects, except as stated in the special rules.

In contrast to several other languages, uniform results in the transliteration of Arabic are difficult to obtain, since vowel points and some of the diacritical marks necessary for the certain identification of the Arabic words are almost always omitted from both handwritten and printed Arabic. It follows that the transliterator must be able to identify the

words used in the names and must know their standard written Arabic spelling, their proper vowel pointing, and how to eliminate peculiarities resulting from dialectical variation. The problem is complicated in most Arabic-language areas by the fact that a large proportion of the geographic names are not available in the Arabic alphabet. This applies to Arabic names as well as to those of non-Arabic origin. Even when Arabic script is available it is not always possible to determine the proper voweling from dictionaries and other reference tools.

The transliteration of the Arabic consonants, vowels, and diphthongs, with examples of the application to geographic names, is given in the tables. *Hamzah*, often omitted in such tables, is included in its logical position before *alif* as a consonant in order to avoid any question as to its proper treatment.

The notes and special rules explain details of transliteration not stated in the tables.

NOTES

1. *Hamzah* is written in Arabic over all initial *aliyis* except those which belong to the definite article *al* or bear a *maddah* (see note 10). When the purpose is to indicate the presence of the sound described as a glottal stop, it is written over internal and final *aliy*, *wāw*, and *yā'* (without dots). *Hamzah* following *i* is written ՚ (almost always the *yā'* is in the ՚ or ՚ form) and the dots are omitted. Example: بَشَر. *Hamzah* following *u* is written ՚. *Hamzah* following a long vowel is written ՚ without anything under it ("without a bearer"). The transliteration of *hamzah* (՚) should always be carefully distinguished from that of "ayn (՚).
2. *Aliy* as such is not transliterated when it is bearer of *hamzah*, but see *fatḥah aliy* and *aliy maddah* in Table II. See also note 1 above and note 10.
3. An original *tā'* in certain endings is written ՚ (i.e., ՚ with two dots) and is called *tā' marbūṭah*. It is transliterated h (silent), except when followed by another word in a unitary expression, when it is transliterated t, as in *hamzah* (isolated form) and *hamzat al waṣl*. A pronounced final *bā'* occurs and for bibliographical purposes may be transliterated /h when a *fatḥah* precedes it (Al Mara/h). Cf. also note 4.
4. The two-letter symbols th, kh, dh, sh, and gh are convenient for use and easily comprehensible. The infrequent sequences of t, k, d, or s followed by h can be unequivocally transliterated for bibliographical purposes by the use of a slant' line ("shilling," "solidus") to separate true h from a preceding t, k, d, or s; that is, th represents *thā'*, but t/h stands for *tā'* followed by *bā'*. Cf. also note 3.

5. Where special considerations are paramount, the sub-dot (ه, س, د, ت, ز) may be used in place of the cedilla (ه, س, د, ت, ز).
6. The letter يَ is also used in writing *alif maqsūrah* in which the dots are omitted. See Table II.

NOTES

7. The classical Arabic grammatical endings written with the so-called nunation symbols (Arabic *tawīn*) may be transliterated when necessary by *aⁿ*, *iⁿ*, *uⁿ*. In modern Arabic these endings have become silent and are omitted in transliteration: classical *alifuⁿ*, modern *alif*.
8. Doubled consonant sounds are written in Arabic by placing the *tashdīd* over the consonant letter written once. In transliteration the letter should be doubled. When the definite article *al* precedes a word beginning with t, th, d, dh, r, s, sh, ḥ, ḫ, z, l, n (the so-called "sun letters"), the l is assimilated in pronunciation, giving tt, thth, etc.
9. *Hamzat al wasl* is transliterated ' in classical forms, as illustrated in its classical name *bamzatu 'l waṣli*, but ignored in modern forms, as in *hamzat al wasl*.
10. *Maddab* is a horizontal wavy line over *alif*. Since *maddab* nearly always occurs in word-initial position, no confusion results from the use of ā for *alif maddab* as well as for /aħab alif/.

SPECIAL RULES

The following notes explain details of transliteration not stated above.

1. Initial definite articles and prepositions should be capitalized and hyphens should not be used to connect parts of names; e.g., Ash Shāriqah and Tall al Lahm.
2. If any evidence is found for the use of the definite article in a name, the article will be used in the name chosen.
3. The Arabic word for God will be written Allāh.
4. Phrase names, commonly transcribed as one word, will be written in separate words. The definite article within such names will be written al, not ul; e.g., 'Abd Allāh, 'Abd ar Rahmān, Dhū al Faqār.
5. The word Ibn will be transliterated Bin wherever written, without *alif*, that is, between two proper nouns; e.g., 'Umar Bin al Khaṭṭāb.
6. The Turkish word Pasa will be transliterated directly from Arabic script as Bāshē; the Turkish word Bey will be romanized as Bey in Egyptian names, no matter how written in Arabic-language sources, but in other Arabic areas as Bak where written bā'-kāf and as Bayk where written bā'-yā'-kāf.
7. The modern colloquial word Sidi will be given precedence over the classical form Sayyidī. (This does not preclude the spelling Sayyidi if the latter is indicated by the Arabic script or other evidence – for instance if the yā' is written with *tashdīd*.)
8. The colloquial word Bū will not be changed to the classical form Abū.
9. The colloquial word for water written mīm-yā'-tā' on Arabic maps will be transliterated Mayyat.
10. In place names of Aramaic origin in Lebanon and Syria with an initial cluster beginning with b plus another consonant such as l or h, initial clusters such as bl and bh will be written.
11. In names containing the words for "back, ridge, hill" appearing as either zā'-bā'-ra' or qād-bā'-ra' in Arabic sources, the spelling used in the sources will be followed.
